

Seminar

Group of Algebra and Geometry

Modularity of geometric objects and related problems

Ariel Martin Pacetti, CIDMA, University of Aveiro

July 14, 2021, 14h00 – 15h00

<https://videoconf-colibri.zoom.us/j/83024894263>

In this talk, I will present the notion of modularity of geometric algebraic objects (the so-called projective varieties) and will explain what modularity of such an object means, based on explicit examples. I will take the opportunity to explain the state of the art, and talk about some very active related problems. The talk is of expository nature, aimed at a general audience, no previous knowledge on the area will be assumed.

This seminar is supported in part by the Portuguese Foundation for Science and Technology (FCT – Fundação para a Ciência e a Tecnologia), through CIDMA – Centro de Investigação e Desenvolvimento em Matemática e Aplicações, within projects **UIDB/04106/2020** and **UIDP/04106/2020**.
